

**"We want to have one mission and target:
Take the nation forward – Digitally, and
Economically"**

- Shri Narendra Modi

Indian Centre for Social Transformation

Indian Centre for Social Transformation is a public charitable Trust (Regd.) with a mission to work towards realization of a national vision set out in Article 51A (j) of the Indian Constitution regarding the

Fundamental Duty of Indian Citizens i.e.

“to strive towards excellence in all spheres of individual and collective activity so that the nation constantly rises to higher levels of endeavor and achievement.”

Demo of Indian CST GPMS Transportal

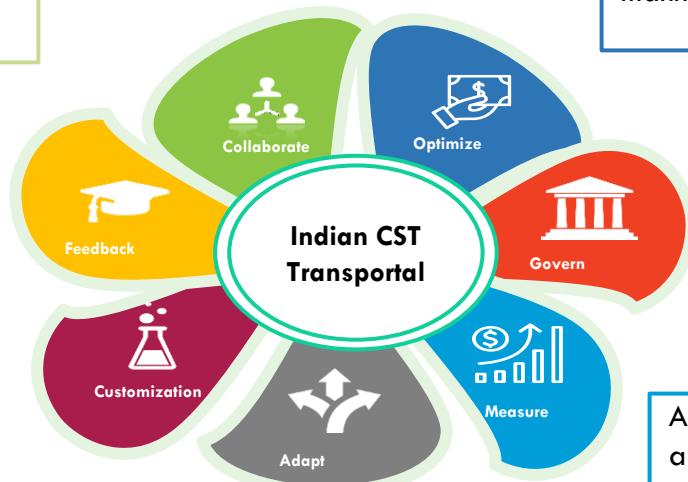

(Note: This is NOT a User manual but only as a guide to you for easy login and viewing the demo pages. We are not vouching the authenticity of the data and are not responsible for the same)

Transportal enables real-time monitoring and evaluation system for citizen and government to take informed decision

Connected to the citizens and government organization to promote collaborative work

Real time feedback/suggestion/complaints for projects

Customized dashboard available at various levels to ensure all the requirements are met

Data is managed in a cost effective manner

Transparency in all the aspects of project execution right from finances to time taken to ensure better governance

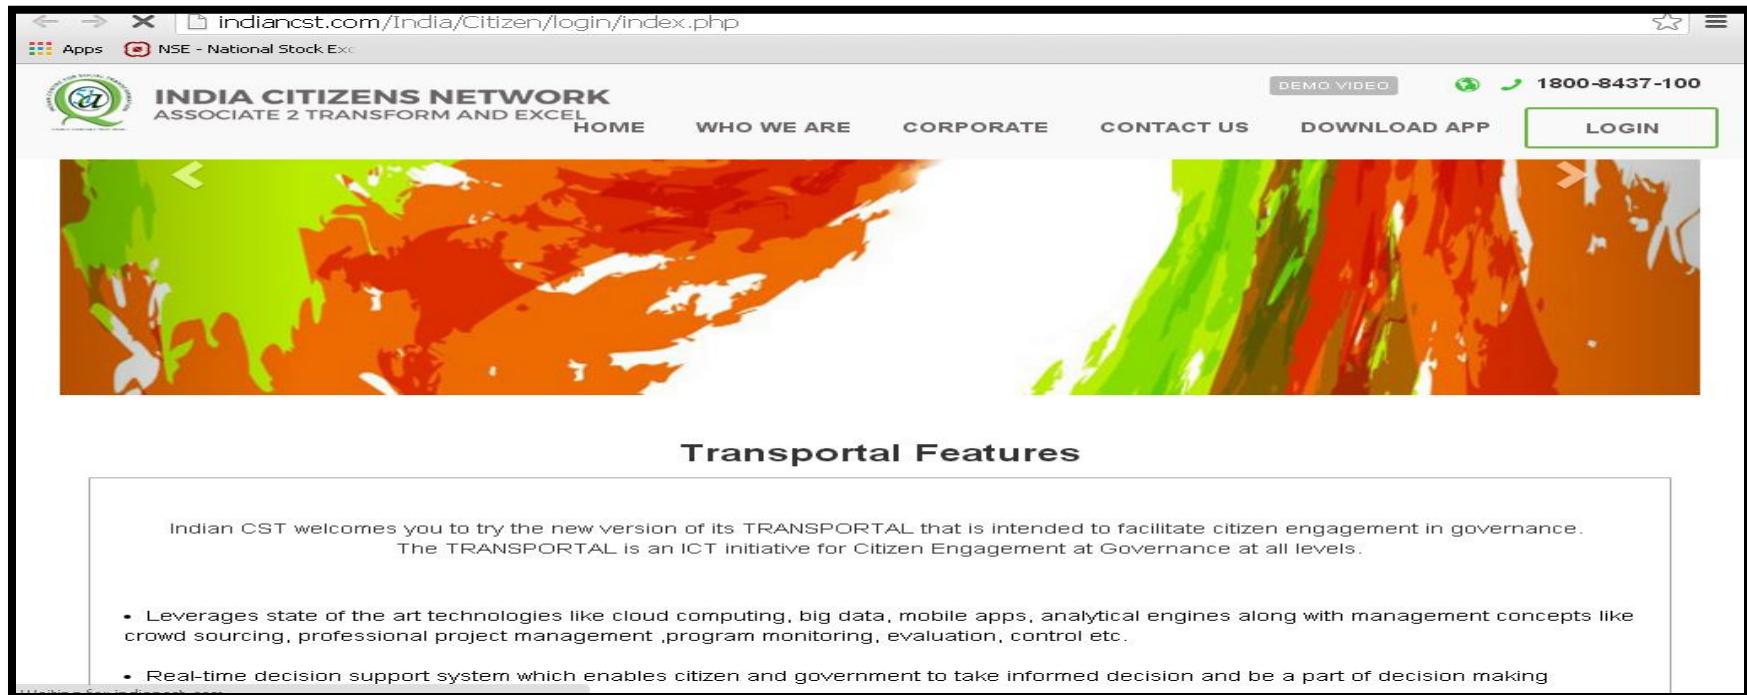

Support fast paced decision-making through agile delivery of data thus reducing overall time taken

Ability to measure the funds allocated and spent for projects under various programs like smart cities

Demo

Accessing the website

Log in to our website @www.indiancst.com/india/citizen

The screenshot shows a web browser window with the URL www.indiancst.com/India/Citizen/login/index.php in the address bar. The page header includes the India Citizens Network logo, the tagline 'ASSOCIATE 2 TRANSFORM AND EXCEL', and navigation links for HOME, WHO WE ARE, CORPORATE, CONTACT US, DOWNLOAD APP, and LOGIN. The main content area features a large, abstract, colorful graphic with orange, red, and green patterns. Below the graphic, the section title 'Transportal Features' is displayed in bold black text. A text box contains the following information: 'Indian CST welcomes you to try the new version of its TRANSPORTAL that is intended to facilitate citizen engagement in governance. The TRANSPORTAL is an ICT initiative for Citizen Engagement at Governance at all levels.' Below this, a list of features includes: '• Leverages state of the art technologies like cloud computing, big data, mobile apps, analytical engines along with management concepts like crowd sourcing, professional project management ,program monitoring, evaluation, control etc.' and '• Real-time decision support system which enables citizen and government to take informed decision and be a part of decision making'.

Transportal Features

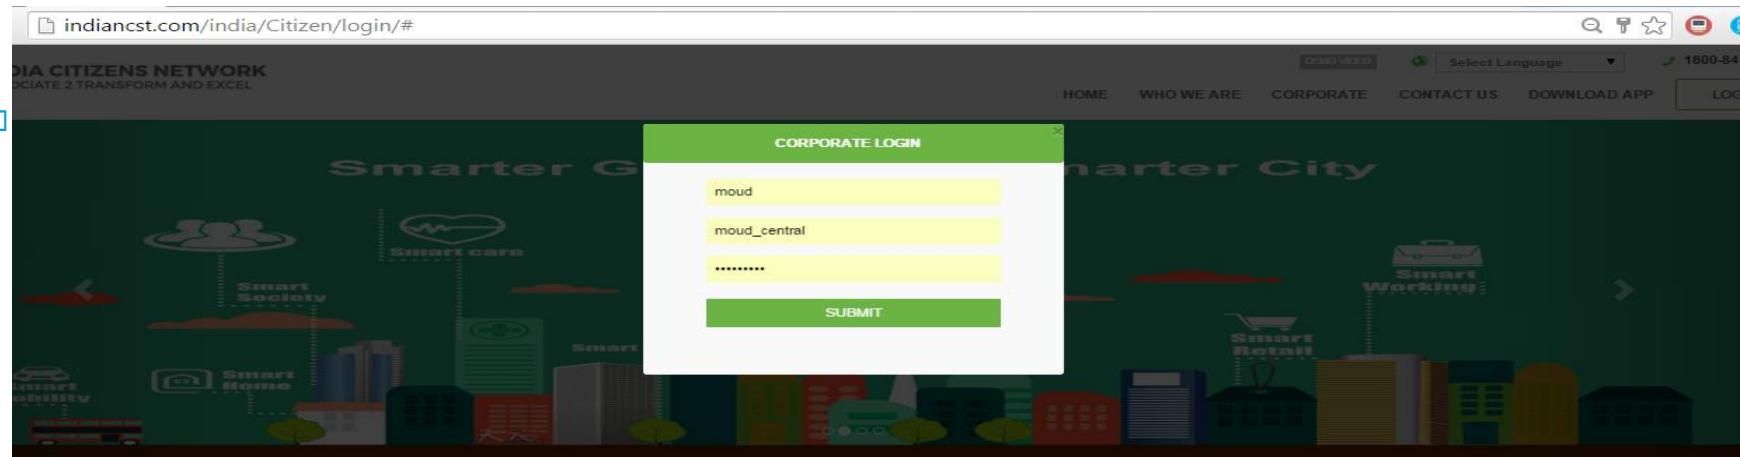

Indian CST welcomes you to try the new version of its TRANSPORTAL that is intended to facilitate citizen engagement in governance. The TRANSPORTAL is an ICT initiative for Citizen Engagement at Governance at all levels.

- Leverages state of the art technologies like cloud computing, big data, mobile apps, analytical engines along with management concepts like crowd sourcing, professional project management ,program monitoring, evaluation, control etc.
- Real-time decision support system which enables citizen and government to take informed decision and be a part of decision making

Login to the System

There are two options: “USER” and “CORPORATE”

- Choose: USER (for Individuals/citizens)
- Choose: CORPORATE(for Super Admin of Companies/Organizations/for use by their Authorized Employees)

Appendix

Access and roles for different users

- User Access is customized for the projects which the user is authorized to access by the Corporate Super Admin.
- Only an authorized user would have access to data based on the roles assigned

Add Documents

- Project documents such as the Agreement can be stored in the Project folder so that access to these documents for reference at any time is facilitated.
- Selected portions of the Documents can be digitised so that the documents can be searched by keywords etc

Customized Reports

- While there are some standard reports which have been mentioned here, we can also customize any report as per user needs.
- We need the structure/format of these reports for the same and the data for these.
- Any new or additional report can also be considered by making suitable modification in data capture stage/by integrating other reports provided the same is made available to us in a form/type as required.

SMART CITIES

E-Governance & Citizen Services, Waste Management Water Management, Energy Management , Urban Mobility and Others

AMRUT CITIES

Water Supply, Sewerage, Septage, Storm Water Drainage, Urban Transport, Green Space & Parks, Reforms Management & Support, Capacity Building and Indicative (not exhaustive) list of inadmissible components

CITIZEN SERVICES

-:Registrations for birth, death, marriage, grievances, etc. Revenue Payment : of property taxes, license fees, electricity and water charges, etc. Service deliveries : Building plan approvals, service delivery approvals, tenders, bidding, payments to contractors, etc. Office efficiencies : Electronic transfer of payments, salaries, online approvals of vouchers and payments, etc.

Annexures

Scope of work for the Smart City Consulting Firm

Number of cities allocated to States based on urban population and number of statutory towns

Preconditions and Documents to be submitted by each State

Criteria and Indicative Table of Contents

Structure and Functions of SPV

Utilization Certificate Format

Scope of work for the Smart City Consulting Firm

100 cities to be taken up under SMART CITIES

500 cities to be taken up under AMRUT

- i. All Cities and Towns with a population of over one lakh with notified Municipalities, including Cantonment Boards (Civilian areas),
- ii. All Capital Cities/Towns of States/ UTs, not covered in above ,
- iii. All Cities/ Towns classified as Heritage Cities by MoUD under the HRIDAY Scheme,
- iv. Thirteen Cities and Towns on the stem of the main rivers with a population above 75,000 and less than 1 lakh, and
- v. Ten Cities from hill states, islands and tourist destinations (not more than one from each State)

Digital India -Pillar 6. Information for All

Online Hosting of Information & documents

Citizens have open, easy access to information

Open data platform

Government pro-actively engages through social media and web based platforms to inform citizens

MyGov.in

2-way communication between citizens and government

Online messaging to citizens on special occasions/programs

Largely utilize existing infrastructure – limited additional resources needed

Transportal enables real-time monitoring and evaluation system for citizen and government to take informed decision

Connected to the citizens and government organization to promote collaborative work

Real time feedback/suggestion/complaints for projects

Customized dashboard available at various levels to ensure all the requirements are met

Data is managed in a cost effective manner

Transparency in all the aspects of project execution right from finances to time taken to ensure better governance

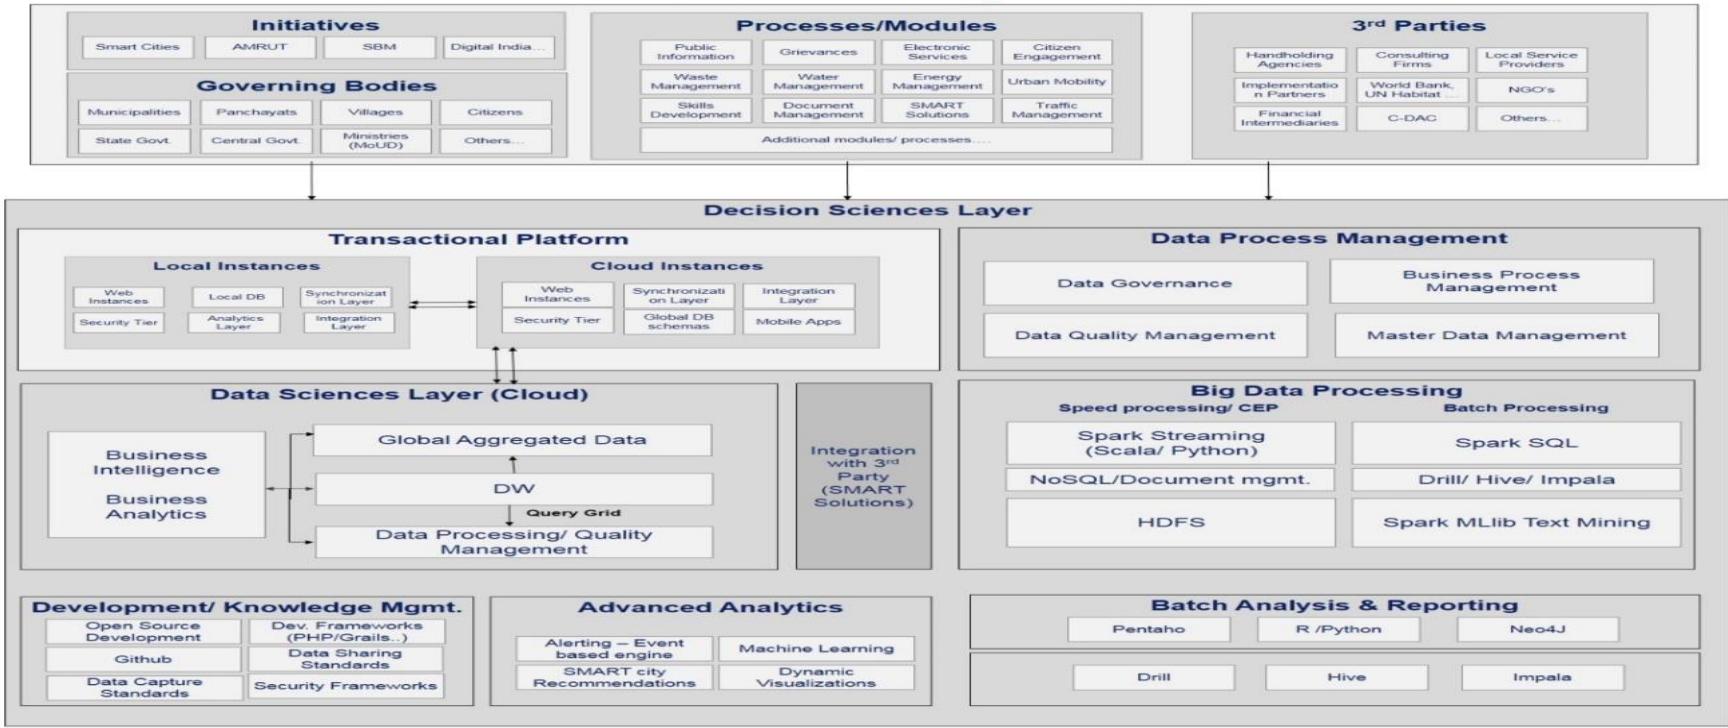

Support fast paced decision-making through agile delivery of data thus reducing overall time taken

Ability to measure the funds allocated and spent for projects under various programs like smart cities

Reference Architecture

SMART Cities: Data Analytics Platform

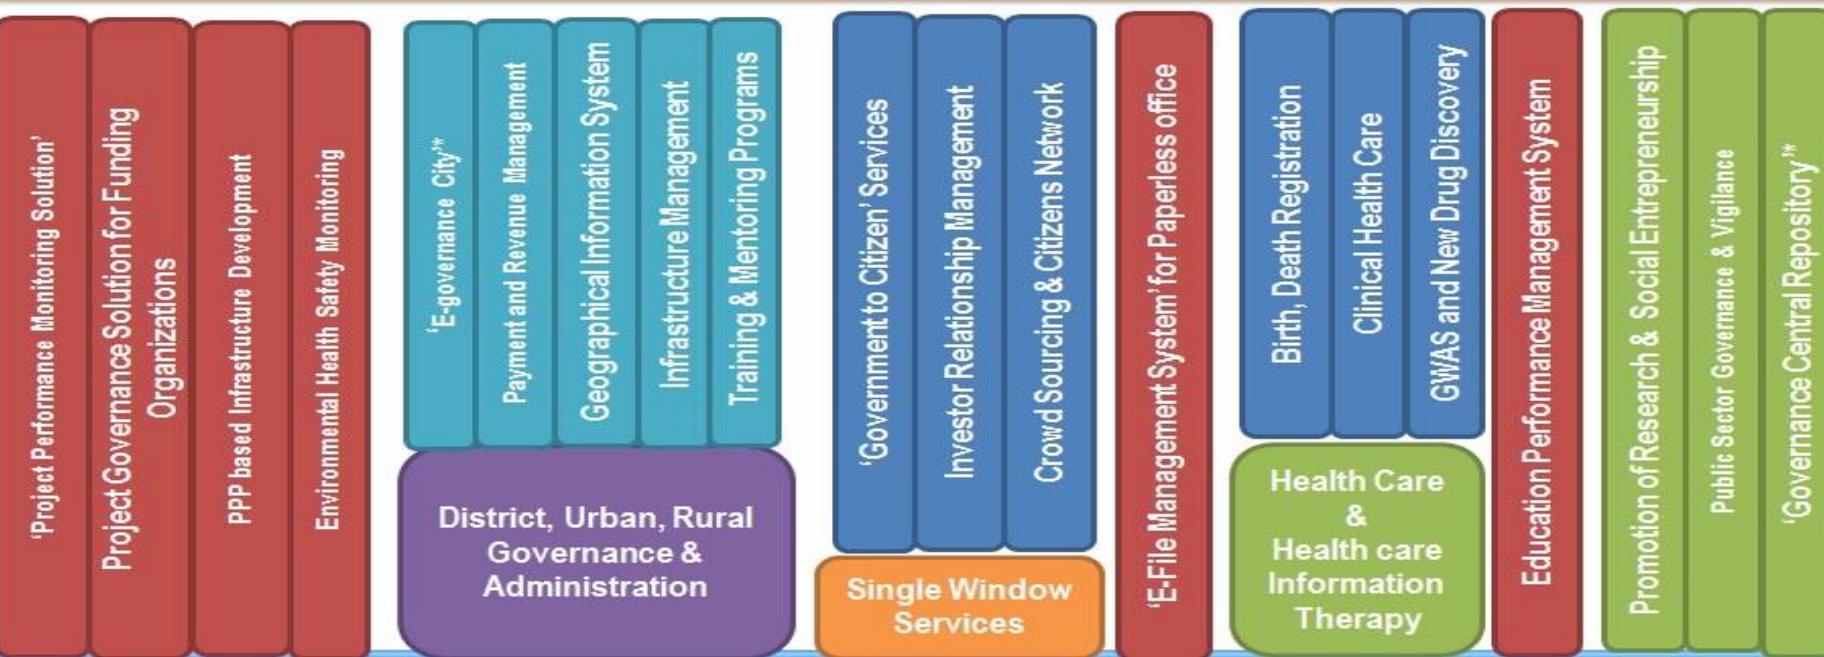

Program on this scale never conceived earlier

Integrated GPMS e-Governance Cloud Computing Solutions

that gets correlated constantly to provide reliable information for actionable intelligence

Project Integration Management-Project Scope Management-Project Time Management-Project Cost Management-Project Quality Management-
Project Human Resource Management-Project Communications Management- Project Risk Management- Project Procurement Management

T- Transparency and Technology * E- Empowerment and Efficiency *A- Audit Trails and Accountability *M- Metrics and Mutual Cooperation
Brings Efficiency, Transparency and Accountability into Publicly Funded Projects/Portfolios using GPMS Cloud

National Data Sharing and Accessibility Policy-2012 (NDSAP-2012)

Department of Science & Technology Ministry of science & Technology Government of India enabled in GPMS....The National Data Sharing and Accessibility Policy will apply to all data and information created, generated, collected and archived using public funds provided by Government of India directly or through authorized agencies by various Ministries / Departments /Organizations / Agencies and Autonomous bodies.

Information based medicine will require unprecedented access to diverse, integrated information

 The diagram illustrates the integration of various medical and genomic data sources. At the center is a globe labeled 'Access to diverse Data' and 'Heterogeneous Data'. Surrounding the globe are several icons representing different data types: 'Patient information' (doctor and patient), 'Hospital events, admissions, surgery, recovery, discharge' (hospital beds), 'X-rays, MRI, Mammograms, etc.' (medical images), 'Clinical Records' (doctor's office), 'Analysis Lab' (laboratory), 'Personal genomics' (person's DNA), 'Expression Arrays (Various Tissues)' (microarray), 'Challenges: Inherent and complementary nature of disparate data - Need for sophisticated analysis - Creating comprehensive disease risk systems' (text box), and 'Integrating information from all systems' (text box).
